

.NET Development

Orient Consultancy has team of experienced Microsoft certified software architects, developers, consultants. We also provides consulting in developing custom enterprise applications development based on .NET framework.

Our .NET team develops and delivers comprehensive solutions utilizing the full range of .NET functionality. Orient team works with your business to understand your requirements and demonstrate the capabilities of .NET framework and develop the system to the requirements

Orient Consultancy expertise extends to Microsoft's .NET Compact Framework, the technology that extends the benefits of .NET technology to mobile devices. The .NET Compact Framework brings the world of managed code and XML Web services to smart devices, and it enables the execution of secure, downloadable applications on devices such as personal digital assistants (PDAs), mobile phones, and set-top boxes. Thanks to the .NET Compact Framework, developers can easily reuse existing programming skills and existing code at all levels, from enterprise server to desktop and handheld device.

.NET Custom Solutions:

- .NET Desktop and Web Application Development
- .NET Software Product Development
- Web Services based .NET Application development
- .NET Mobile Solutions (Microsoft's .NET Compact Framework)
